- Position laminator so you have enough space to allow items to pass freely through the machine.

LAMINATION STEPS

Slide On/Off/Pouch Thickness selector to 75/80 or 100/125 micron setting to match pouch thickness and wait for green Ready Light.

Place item inside pouch against the sealed edge. To prevent jamming, use a carrier when item is smaller than the pouch.

Place pouch, sealed edge first, into laminator entry. Keep pouch straight and use the edge guide to center it.

To prevent jamming, immediately remove laminated item from back of machine. Let item cool on flat surface for several seconds.

Before switching off laminator, feed empty cleaning/carrier sheet through machine to clean unit.

TROUBLESHOOTING
